

Forex Secret 12

Did you know there is up to 80 different Forex Currency Pairs that can be traded?

What if we told you that you could drop over 80% of all the currency pairs out there and just focus on Swing Trading the very best, most consistent performers? Over the last 6 years, we have tested and live traded thousands of forex trades amongst dozens of pairs.

Quite simply, this is the Forex Secret 12. The Top 12 Pairs that Swing Traders should focus on in 2018 and beyond. We've saved you a ton of work (and potential agony:) so here goes:

1. GBPAUD
2. XBRUSD
3. EURAUD
4. XTIUSD
5. CHFJPY
6. USDJPY
7. XAUUSD
8. NZDCAD
9. GPBUSD
10. GBPCAD
11. USDCAD
12. EURJPY

Remember, this is using nearly 6 years of data. There are always exceptions year-to-year but this top 12 are the most consistent over a long stretch of time.

Surprised the EURUSD is not there? It turns out while an excellent pair to use for day trading, it has been the most consistent for swing trading. You still have highly liquid pairs such as GBPUSD and USDJPY in the list. And, perhaps a few surprises I imagine?

There's also a new kid on the block. BTCUSD. Bitcoin (and Ethereum) can now be traded at many Forex based brokers worldwide. In 2017, there was an 800% return. Ethereum just behind that. We know 2017 was a stellar year for both, but 2018 has continued the surge. Remember, with a forex broker we can go short as well.

The Top 12 now becomes the Top 14 when you add BTCUSD and ETHUSD.

There are some limitations with shorting in the U.S. and trading cryptos with forex brokers but there are some workarounds including buying only (and not using margin which really is not necessary) Outside the U.S.? Everything goes.

Focus on the Top 12, or Top 14 with Crypto and you'll concentrate the best returns with the least effort throughout 2018 and beyond.
