Expanded FAQ for ETF Income Accelerator

1. What exactly is the ETF Income Accelerator?

The ETF Income Accelerator is a system that uses covered call and leveraged ETFs to generate weekly and monthly income with minimal effort. It combines a consistent income-generating approach with tools for growth and market timing to help investors capitalize on both income and market opportunities without needing to spend hours managing their portfolio.

2. How much time will this take each week?

Most members only need 5 minutes per week. The system is designed to be time-efficient, so once it's set up, you'll only need to review the weekly market timer alerts to make any adjustments. It's ideal for busy people who want income without the stress of daily trading.

3. Is this suitable for beginners?

Yes! The ETF Income Accelerator is beginner-friendly, with clear, stepby-step modules, pre-designed portfolios, and easy-to-follow market timers. Whether you're new to ETFs or a seasoned investor, the system is built to be accessible for all experience levels.

4. How much money do I need to start?

There is no minimum investment amount, and the system is designed to work with accounts of all sizes. Whether you're starting with a few thousand dollars or a larger portfolio, the system can help you achieve steady income and growth.

5. How does the ETF Power Ratio work?

The ETF Power Ratio is a proprietary indicator developed by NetPicks, with a 10+ year track record analyzing over 140 global ETFs. This ratio helps assess overall market health, letting you know when conditions are favorable (bullish) or cautious (bearish). It simplifies the process of determining market sentiment so you can make better-informed decisions.

6. What do the Market Timer Alerts mean?

The Market Timer Alerts provide color-coded signals (Green, Yellow, Red) that tell you when to enter, hold, or exit specific ETFs based on current market conditions. They're designed to make the process straightforward:

Green: Favorable entry points.

Yellow: Neutral, hold position or proceed with caution.

Red: Consider exiting positions to protect capital. These signals help mitigate risks associated with leveraged ETFs and allow you to optimize returns.

7. Can I reinvest the income to grow my portfolio faster?

Absolutely. Many members choose to reinvest their income to compound returns. The income generated from covered call premiums and dividends can be reinvested to accelerate portfolio growth over time without additional contributions.

8. Are there risks involved in using leveraged ETFs?

Leveraged ETFs can amplify both gains and losses, so they come with higher risk than traditional ETFs. That's why the ETF Income Accelerator includes timing tools to help reduce the downside risk and protect your investment. We recommend using leveraged ETFs for a smaller portion of your portfolio (10-20%) to balance growth and risk.

9. Is there active trading involved?

No. The ETF Income Accelerator is designed to be a passive, incomegenerating strategy. You'll follow a structured approach, and adjustments are only made based on weekly alerts, so there's no need for active trading or daily monitoring.

10. How is the ETF Income Accelerator different from traditional buy-and-hold investing?

Traditional buy-and-hold strategies don't provide regular cash flow, and they can be vulnerable to market downturns. The ETF Income

Accelerator, however, uses covered call ETFs to generate regular income, along with leveraged ETFs for growth potential, and timing tools to optimize performance. This approach helps smooth out returns and provide more consistent income compared to holding a traditional stock portfolio.

11. Can I cancel my subscription at any time?

Yes, for members on the monthly plan, you can cancel at any time. If you choose the Unlimited Access option (one-time fee), you'll have lifetime access to the program, tools, updates, and ongoing support without any further fees.

12. Is support available if I have questions?

Yes! All members have access to the Private Owner's Club, where you'll find ongoing support, training, and direct access to Mark Soberman and the NetPicks team. You can also attend monthly live Cash Flow Workshops to get real-time guidance and answers to your questions.

13. Can I use my existing brokerage account to trade these ETFs?

Yes, as long as your brokerage allows U.S. ETF trading. Most major brokers, such as Schwab, Fidelity, Etrade, and Interactive Brokers, and many more, offer access to U.S. ETFs and support the strategies used in the program.

14. Will I need to pay additional fees beyond the membership fee?

No. Beyond the membership fee, there are no additional programrelated costs. However, typical broker fees or commissions may apply depending on your brokerage. Choosing the Unlimited Access option provides lifetime access with no ongoing fees.

15. What happens if I miss a live Cash Flow Workshop?

No problem! All live Cash Flow Workshops are recorded, and members can access replays in the Private Owner's Club. You'll have

unlimited access to these recordings, allowing you to revisit any session at your convenience.

16. Can I access this on mobile or tablet devices?

Yes, the program and its resources are accessible on mobile devices, tablets, and desktops, so you can check updates or manage your investments from anywhere.

17. How long will it take to see results?

Most members start generating income within a few weeks, but results vary based on initial investment and individual goals. With consistent application of the system, you'll see income generation as early as your first month. This is not a fast track to riches. This is about smart investing, using time and new strategies to create income and account appreciation over time.
